

# Linking Accounts in Mobile and Online Banking

## All Your Accounts in a Single View

Instead of switching between multiple apps to see all your financial transactions, combine them in one place online or in the First Oklahoma mobile app.

Here's how:

- Look for the "Link an account" action.
- A new window will appear. Choose from the list of default banks or search for your financial institution using the search bar.
- If you still can't find it, no worries! Let customer support know which bank you want to add.
- Once you've linked an account, it'll show up right at the top of your dashboard, after your First Oklahoma accounts.

## Why Bring all Your Accounts Together?

Consolidating all your accounts into one mobile app helps you save time while budgeting and tracking expenses. It's highly convenient, with everything in one place, making life easier and providing a clear view of your finances. Give it a try - combining your accounts into one app simplifies and streamlines your financial management.
