

# Wire Transfer migration to ISO20022

Important changes are on the horizon for Wire Transfers. Here's some information to get your started on what they are, what they mean, and when they will happen.

## What is ISO20022?

Federal Reserve Banks currently use a proprietary wire format that is specific to the Fedwire Funds Service. This current FAIM format (Fedwire Application Interface Manual) is being replaced in favor of the ISO20022 (ISO) format, which is a global standard used by many financial institutions.

## What does this mean?

All wires sent through the Federal Reserve will need to be in compliance with the ISO20022 standards before the deadline. There are significant wire format and field label changes associated with this migration.

## When is this happening?

The Federal Reserve cutover to ISO20022 from FAIM is **July 14, 2025**. All wires sent on or after this date must be in the new ISO format.

Here are some key terminology changes that will take place:

FAIM format (current)	ISO20022 format (effective July 14, 2025)
Beneficiary	Creditor
Originator	Debtor
Originating Bank/Sending Bank	Debtor AND Instructing Agent
Beneficiary Bank	Creditor Agent
Domestic Intermediary	Instructed Agent
International Intermediary Bank	Intermediary Agent
Routing Number	Agent ID
Reference Beneficiary	End to End ID
Address Line 1	Building Number and Street Name
Address Line 2/3	Department, Sub Department, Building Name, Floor, Room, Town Location Name, District Name, Post Box
City	Town Name
State	Country Sub Division
Zip Code	Post Code
Country	Country
Account Number	Account Number
Amount	Amount
Additional Information	Remittance Information
Purpose	Purpose

## Those address fields don't seem to line up. What should we expect on Day 1?

You should plan to review your Creditors (Beneficiaries) on Day 1, especially those that are tied to any recurring wires. You won't be able to make changes to Creditor information prior to July 14, so please ensure you plan to review in a timely manner.

## What can I be doing now?

- Please review your existing wire beneficiary list and delete any that you no longer need or use.
- Be aware of the upcoming changes and review all information we'll be sharing with you up until the migration date.
- Mark your calendars for **July 14, 2025!** You'll want to log in early on this day to ensure recurring wire data is correct.

## How is First Oklahoma Bank helping us prepare for this change?

- As there isn't a 1:1 ratio between FAIM and ISO fields, we're only able to bring over limited amounts of data for wires. The biggest difference are the address fields, and for those changes we will be moving the information from Address Line 1 (FAIM) to Street Name (ISO). There is a 70-character limit for the Street Name field. Any Address Line 1 entries will be truncated as necessary.
- For Domestic wires only: not all of the new and segmented address fields are required, so if the data is slightly off the wire should still be able to be sent if the following required fields have not changed:

Agent ID (Bank ID)	Account Number
Agent Name (Bank Name)	City/Town Name (City)
Agent City (Bank City)	Agent Country
Agent State (Bank State)	

## Will the way wires are set up and sent change as well?

In general for the Treasury Management product you access each day, only the fields and their labels are changing. There are many behind-the-scenes changes, but don't worry – we'll take care of those for you!

Here is a preview of how the screens will be different. Example: Create Domestic Creditor

The image displays two side-by-side screenshots of web forms for creating domestic wire transactions. The left form is titled 'Create a Domestic Beneficiary' and the right form is titled 'Create a Domestic Creditor'. Both forms have a three-step progress indicator at the top: '1. Beneficiary Information', '2. Review', and '3. Confirmation'. The left form includes fields for Bank ID, Routing Number, Bank Name, Bank City, Bank State, Account Number, Re-enter Account Number, Name, Address (with sub-fields for Address Line 1 and Address Line 2), City, State, and Zip Code. The right form includes fields for Agent ID, Routing Number, Agent Name, Agent City, Agent State, Account Number, Re-enter Account Number, Name, Country, Building Number, Street Name, City/Town Name, State/Country Sub Division, and Post Code. A blue box highlights the 'Address' section of the left form and the 'Building Number' section of the right form, with a blue arrow pointing from the left box to the right box, indicating the mapping of address information between the two forms.
